

Review for Tracery Professional Builders, Inc.

jeff kraus

I used Tracery for an earthquake bracing. I have never dealt with a more professional company. every email and phone call was answered in a timely manner. when I was told that someone would show up, they showed up exactly on time. I was shocked when the person that I was talking over the phone and had met once for the initial measurement showed up the day the work was to be done to introduce the workers to me. All work was completed ahead of schedule and was exceptionally clean
