

## Review for Tracery Professional Builders

Igleslie

Tracery Builders performed seismic strengthening to our home's existing foundation, and attic beams. The crew was on-time, the worksite was covered with a dust barrier system to keep the dust contained, and the job was completed according to the proposal's timeline and cost. When the job was complete, Mark re-inspected the work for accuracy, and his crew even meticulously vacuumed our hardwood floors. We highly recommend Tracery Builders!
